Anti-intrusion Alarm The best protection for your business

1 Early intrusion detection

Our advanced technology allows us to detect the burglar and activate the security protocol before he has even entered the premises.

2 The best human response: immediate intervention with ZeroVision. NEW

Our Alarm Monitoring Station is the largest and most advanced in Europe, with specially trained security experts who monitor every alarm trigger using the most advanced verification protocols that enable us to act immediately if there is an attempted intrusion.

Verification in 29 seconds

Our cutting-edge devices and technology allow us to verify every alarm trigger using image and audio in a record average time: **29 seconds**.

mmediate intervention with ZeroVision n the event of a verified intrusion, we will generate a ero visibility situation through a thick fog that will bloc urglar's vision to prevent theft.

3 Professional intervention: police alert + guard response.

Thanks to our experience of over 24 years protecting homes and businesses in Spain, we maintain a close cooperative relationship with the Police and Security Forces which ensures us of their utmost commitment when responding to our calls.

Notification to the Police

In the event of a verified intrusion, we call the Police immediately.

Security guard

f there is an attempted break-in, our Security guard will check our property and will remain until it is secure.

Sentinel Anti-jamming Alarm The best protection against the most advanced burglaries

1 Jamming detection

The most advanced burglars use frequency jammers to block alarm signals. Sentinel scans the surrounding area constantly looking for any jamming signal that could endanger the security of your business premises.

2 ATN transmission network immune to jammers (RED/ATN)

Securitas Direct alarm is able to continue transmitting alarm signals even if the burglar uses a frequency jammer thanks to its exclusive ATN network that is immune to jamming.

ATN Network More than 1.500 ant deployed throughout

3 Professional intervention: specific anti-jamming protocols.

If there is an attempted break-in with a frequency jammer, out specialised agents will activate the anti-jamming protocol.

Specialised agents

protocols They will alert the Police or send a Security quard if necessary

2. Jamming detection

When Sentinel detects a jamming signal, it immediately sends an alert to our Alarm Monitoring Station.

3. Real time information You can check at any time whether your alarm is being jammed thanks to Sentinel's display screen.

Protection against hazards and emergencies The best protection for you and your employees

SOS

EMERGENCIES

sos 🚺 🚺 🖶
