SECURITAS DIRECT ALARMS
We protect what matters most.

Anti-intrusion Alarm

The best protection for your home

1 Early intrusion detection

Our advanced technology allows us to detect the burglar and activate the security protocol before he has even entered the premises.

1. Maximum deterrence
Deterrent signs are the first barrier that the burglar comes up against.

Deterrent signs

2. Access protection
Protection for doors and windows with impact, vibrations and opening sensor.

Shocksensor

3. You can move within the house freely
Activate only part of the system's sensors creating an external protective barrier.

Control Panel Partial Mode

2 The best human response: immediate and effective against burglary

Our Alarm Monitoring Station is the largest and most advanced in Europe, with specially trained security experts who monitor every alarm trigger using most advanced verification protocols that enable us to act immediately if there is an attempted intrusion.

Verification in 29 seconds

Our cutting-edge devices and technology allow us to verify every alarm trigger using image and audio in a record average time: **29 seconds**.

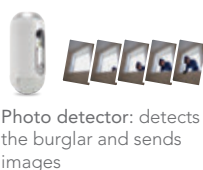

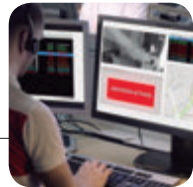

Photo detector: detects the burglar and sends images

Immediate intervention with ZeroVision

In the event of a verified intrusion, we will generate a zero visibility situation through a thick fog that will block burglar's vision to prevent theft.

OPTIONAL

3 Professional intervention: police alert + guard response.

Thanks to our experience of over 25 years protecting homes and businesses in Spain, we maintain a close cooperative relationship with the Police and Security Forces which ensures us of their utmost commitment when responding to our calls.

Notification to the Police

In the event of a verified intrusion, we call the Police immediately.

Security guard

If there is an attempted break-in, our Security guard will check your property and will remain until it is secure.

Sentinel Anti-jamming Alarm

The best protection against the most advanced burglaries

1 Jamming detection

The most advanced burglars use frequency jammers to block alarm signals. Sentinel scans the surrounding area constantly looking for any jamming signal that could endanger the security of your home.

1. Anti-jamming deterrence
Warning signal to the burglar that if he uses a jammer it will be detected.

Deterrent signs

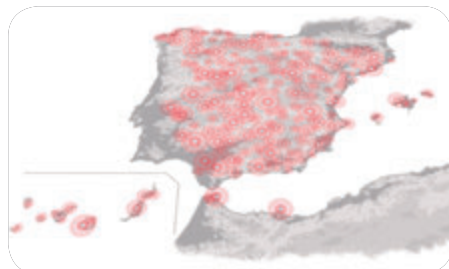

2. Jamming detection

When Sentinel detects a jamming signal, it immediately sends an alert to our Alarm Monitoring Station.

2 ATN transmission network immune to jammers

Securitas Direct alarm is able to continue transmitting alarm signals even if the burglar uses a frequency jammer thanks to its exclusive ATN network immune to jamming.

ATN Network

More than 1.500 antennas deployed throughout Spain.

3 Professional intervention: specific anti-jamming protocols.

If there is an attempted break-in with a frequency jammer, our specialised agents will activate the anti-jamming protocol.

Specialised agents

Our security experts are specialised and trained in receiving jamming signals and knowing how to act in seconds using the most exclusive verification protocols. They will alert the Police or send a Security guard if necessary

NEW Sentinel

Jamming

Always active, jammer-proof, it protects you at all times just like a sentinel should.

Air quality

SOS SOS emergencies

1 Detection of danger and emergencies

Sentinel offers you the best protection for you and your family because it is always checking that there is no danger in your home (SOS alert, sudden change in temperature, etc.).

1. Emergencies at home

Our alarm has an SOS system that you can activate at any time and in any emergency.
